Fortify for Endpoint Security

A complete endpoint security solution for your business' needs.

Is your business looking for threat protection, remediation, incident response and the benefits of a security operations center (SOC)? Fortify for Endpoint Security monitors your IT environment, detecting malicious threats and quickly remediating the attack, with 24/7 support from our experienced SOC.

With coverage from multivariant ransomware attacks to the latest cryptomining infiltrations, advanced endpoint threat management from All In Tek coupled with SOC monitoring and remediation services stops active threats and minimizes harm. And, it's all backed by a $1m ransomware warranty.

Key benefits

On-demand security operations

Threats and attackers target SMBs the same as big enterprise firms, leveraging the same tactics. We provide a security operations center (SOC) that scales protection with your business, providing the staff necessary to drive threat remediation.

Simple deployment, always-available threat coverage

Our technology detects all known and unknown threats leveraging the latest behavior-based technology, regardless of where your endpoints are deployed (office, home, airport, café, hotel, etc.).

Next-gen threat detection and remediation

Our solution incorporates patented threat identification and remediation technology, to fully protect desktop and server environments for Windows, Mac and Linux, as well as virtualized servers in AWS, VMWare, Citrix, VirtualBox, and Hyper-V.

Ransomware peace of mind

A $1m warranty is included to cover costs for ransomware in the unlikelihood it is unable to protect or remediate. While it is not likely ransomware will ever impact you when using Fortify for Endpoint Security, it's nice to know you are covered.

How we do it better

- 24x7 SOC service
- Immediate risk identification
- Effective response, quick remediation
- Ransomware rollback

Key features

Complete SOC Services

Implement advanced operations without the need for in-house security expertise. The complete Fortify SOC analyzes quarantined applications and files, reducing false positives and ensuring comprehensive protection. We take care of the challenges of cybersecurity while you focus on your business.

Threat Detection

Our solution rapidly recognizes thousands of viruses and malware attack variants, including cryptomining attacks, as well as the root causes of these malicious behaviors, by quickly identifying and diagnosing corrupt source processes and system settings.

Response and Remediation

When malicious behavior is detected, Fortify for Endpoint Security will quickly rollback files to previous safe versions through tracking changes in your devices and restoring them to an acceptable risk state.

Next-Generation Endpoint Security

Fortify for Endpoint Security utilizes the patented SentinelOne platform for its unique malware detection and remediation technology. This solution incorporates the industry's most innovative prevention, providing visibility into the root causes and origins of the threat, reversing the malicious operations and remediating them at an agile speed as needed.
